EVOLIS BADGE STUDIO
Change Log of public software versions

Badge Studio 2.2.0 – 17/10/2023

Application
- New tool to create vCard QR codes.
- New vCard templates.

Database
- Column contents can be sorted by alphabetic order.

Badge Studio 2.1.1 – 01/04/2022

Driver
- Integration of the driver 6.36.0.1678 to fix printer supervision issues.

Badge Studio 2.1.0 – 01/10/2021

Application
- Image clipping function: resizing of an image or a photo into a circle or a rectangle with rounded corners.
- Arabic language available.
- Embedded documentation directly accessible in the Help menu.
- Improvement of some User Interface elements.
- Updated print window.

Design
- New behavior of the Copy / Paste function. Applicable for variable elements (text or images) to create a new independent element with the same graphic characteristics in the design area with its own column in the database.
- 9 new card templates included in the application.
- New category available in the badge creation wizard for interior signage.

Database
- Export of the database content to an Excel file (available for Plus edition only).
- Add a video in the import data wizard to help to match the design with the imported excel file content.

Installation
- Possibility of not installing the printer driver at installation (only on Windows).

Badge Studio 2.0.1 – 02/04/2021

Application
- Enhance the responsivity of the design according Windows parameter.
- Compatibility with the Badgy 1 printer no longer guaranteed.

Licensing
- Authorization to enter upgrade coupons with 20 characters (new format of Badge Studio v2) and with 64 characters (old format of Badge Studio v1).

Database
- Copy and paste multiline function (up to 10 records).

Badge Studio 2.0.0 – 13/03/2020
